

Monoseal[®] for Food and Beverage

Trusted Sealing Solutions to Preserve Product Freshness

Lock in flavor and freshness for all your food and beverage products with Monoseal liners from TekniPlex. These one-piece induction heat seal liners provide an airtight seal to prevent product spoilage and extend shelf life. Monoseal forms a robust bond with multiple container types, including PP, PE, PET, and glass, to provide superior product protection for a variety of products.

Features and Benefits:

- Strong induction seal prevents leaks and protects product integrity
- Oxygen barriers seal in freshness and protect against spoilage, reducing product waste
- Compatible with multiple container types including PP, PE, PET, and Glass
- Available both on-reel and as punched parts
- Fast lead times and responsive customer support
- European-based production, backed by global materials science expertise

Monoseal liners are engineered to seamlessly integrate into your production processes, keeping downtime to a minimum.

With production in mainland Europe, customers can be confident that they will have access to reliable supply, enabling them to cut back on storage costs and reduce the risk of costly stock outs.
