

Rubber and Plastic Rollstock, Coils

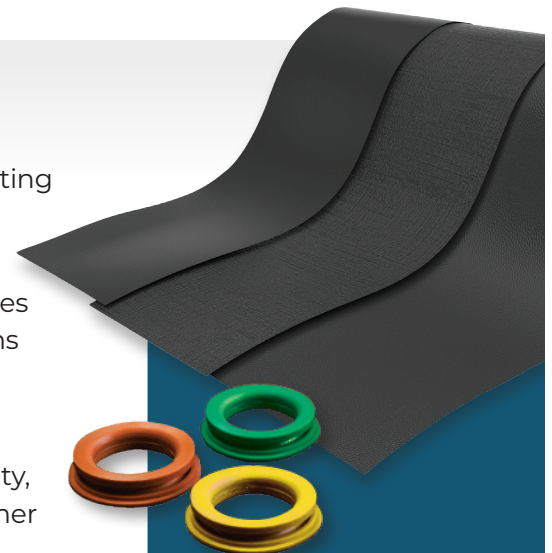

For die-cutting and converting applications

Over the past seven decades, TekniPlex has earned its reputation as a premier global manufacturer of performance-oriented rubber and plastic solutions. Investments in new mixing, calendering, and curing systems has enabled us to expand our custom compounding capacity to meet growing demand.

Features and benefits:

- Base rubber polymers (neoprene, nitrile, butyl, EPDM, Viton, etc.)
- Plastic (polyethylene, polypropylene, polystyrene, vinyl, TPEs)
- Custom compounding directed by expert rubber chemists
- Onsite lab means faster development of custom solutions
- Food contact and pharma compliant
- Tight tolerances meet the highest industry standards
- 36-inch wide calendered rolls, thickness from 0.028 to 0.250 inches
- Rollstock ideal for die-cutting gaskets, valves, seals, washers, etc.
- Partnering with companies to custom-create solutions
- Backed by global technology assets
- Markets: health and beauty, lawn and garden, consumer products, food and drug, automotive, construction, industrial, and more
- Compounding facilities in the U.S. and Europe mean seamless global supply

Custom manufacturing results in high-quality, tight-tolerance rubber and plastic rollstock in a variety of colors
